PROTEAN® Fragment Plating System
INSTRUCTIONS FOR USE FOR ASIA

R: For use by physicians only. Federal Law restricts this device for sale by or on the order of a physician.

Failure to follow instructions may lead to patient injury.

This package insert is designed to provide Instructions for Use of the PROTEAN® Fragment Plating System.

Description

The PROTEAN® Fragment Plating System is a set of titanium bone plates designed for stabilization and repair of small bone fragments. Included in the set are titanium and cobalt chrome bone screws, K-Wires, and specialized instrumentation. The system is provided non-sterile and is sterilized in the user facility.

The PROTEAN® Fragment Plating System is comprised of:

- Titanium alloy plates
- Titanium and cobalt chrome screws
- Stainless steel and cobalt chrome K-Wires (for provisional fixation not for implantation)

Indications

The Skeletal Dynamics PROTEAN® Fragment Plating System is intended for stabilization and fixation in fresh fractures, revision procedures, joint fusion and reconstructions of small bones of the hand, foot, wrist, ankle, humerus, clavicle, scapula, finger, toe, and pelvis, particularly in osteopenic bone with the appropriate configuration of the device. The system is intended for use in adult and pediatric patients (children and adolescents)

Contraindications

Prior to using the PROTEAN® Fragment Plating System, ensure that none of the following patient conditions are present: active or latent infection, insufficient quantity or quality of bone and/or soft tissue, material sensitivity, or patients who are unwilling or incapable of following post operative care instructions. The use of the PROTEAN® Fragment Plating System is contraindicated in cases where the implant(s) would cross open epiphyseal plates in skeletally immature patients.

⚠ Warnings & Precautions

- If the screws are not attached and/or fully tightened, a non-union, delayed union or construct failure may occur.
- The information in this document should be shared with the patient.
- The patient should be informed about the importance of following the post operative rehabilitation prescribed to fully understand the limitations in activities of daily living. The patient must be warned that failure to follow postoperative care instructions may cause the implant or treatment to fail.
- Potential Fragment Plating System construct failures such as implant breakage, loosening, fixation failure, delayed union, or non-union may occur as a result of non-compliance to post operative rehabilitation, excessive wrist activities or construct overloading.
- DO NOT reuse any of the Fragment Plating System implantable components. Reuse may compromise the structural integrity of the construct.
  DO NOT open the volar capsule as it may devascularize fracture fragments and destabilize the volar wrist ligaments.
- Protect the Fragment Plating System's implantable components against scratching or nicking. Such stress concentration can lead to implant failure.

© 2026 Skeletal Dynamics, Inc.

- Before using the Fragment Plating System, inspect all implants and instruments for wear, disfiguration and physical damage. If evidence of wear, disfiguration or physical damage is found, DO NOT use and contact your local Skeletal Dynamics representative or the Skeletal Dynamics Customer Care Department.
- DO NOT permanently implant the Skeletal Dynamics K-Wires; they are intended to be used during provisional fixation of the Fragment Plating.
- DO NOT permanently implant the pre-loaded Drill Guides or AIMing Guides; they are intended to be removed prior to peg insertion.
- DO NOT use peg/screw lengths that will excessively protrude through the far cortex as it may result in soft tissue irritation.
- The maximum angulation of the PLS should not exceed 10° from the trajectory of the respective hole.
- The Non-locking Threaded Pegs are NOT intended to provide subchondral support. Their use should be limited to capture remote bone fragments where partially or fully threaded pegs cannot be used.
- The Fragment Plating System is to be used only with Skeletal Dynamics instruments, implants and accessories.
- Dispose of contaminated implants and instruments per established facility guidelines and protocols.
- Caution should be taken for interference to pacemakers during electrocautery or by uncertified drill power sources.
- Seek medical help immediately if implant malfunctions.
- To maintain traceability of the Fragment Plating System implantable components, you must record each of the respective components LOT numbers into the patient records.

Potential Adverse Events

Possible adverse effects associated with PROTEAN® Fragment Plating System implants are infection, non-union/delayed union, persistent pain, loosening, migration of the implants, implant breakage, nerve or soft tissue damage, and bone fracture.

⚠ MRI Safety Information

The PROTEAN® Fragment Plating System has not been evaluated for safety and compatibility in the MR environment. It has not been tested for heating, migration, or image artifact in the MR environment. The safety of the PROTEAN® Fragment Plating System in the MR environment is unknown. Scanning a patient who has this device may result in patient injury.

Directions for Use:

The PROTEAN® Fragment Plating System should only be used by surgeons who have experience with this system. Each surgeon must evaluate the appropriateness for the use of the Fragment Plating System based on their clinical experiences. Please refer to the appropriate PROTEAN® Fragment Plating System's Surgical Technique Guide (MKT-00005-00, MKT-00082-00, MKT-00485-00 & MKT-00498-00) to review the surgical approach as described by Jorge L. Orbay, M.D. of the *Miami Hand and Upper Extremity Institute* located in Miami, Florida.

Cleaning, Sterilization, and Inspection

For instructions on cleaning, disinfection, sterilization, and inspection of the PROTEAN® Fragment Plating System products please refer to the cleaning and sterilization instructions for use (IFU-04056-07). Refer to the Protean Fragment Surgical Techniques (MKT-00005-00, MKT-00082-00, MKT-00485-00 & MKT-00498-00) for proper kitted tray arrangement.

Resources

The latest version of the Instructions for Use may be requested in a physical format by email (orders@skeletaldynamics.com) or by phone (+1-877-753-5396). The physical copy will be provided within 7 calendar days of receiving a request from the user or at the time of delivery of the device if so requested at the time of order.

For the most current instructions for use visit www.skeletaldynamics.com/resources. Instructions for Use should always be reviewed before using or implanting a device

SYMBOLS GLOSSARY

Symbols that follow BS EN ISO 15223-1 / Medical Devices-Symbols to be used with medical device labels, labelling and information to be supplied.

Symbol	Symbol Reference Number and Title	Description
	5.2.7 Non-sterile	Indicates a medical device that has not been subjected to a sterilization process
	5.1.6 Catalogue Number	Indicates the manufacturer's catalogue number so the medical device can be identified
	5.4.3 Consult Instructions for Use	Indicates the need for the user to consult the instructions for use
	5.1.5 Batch Code	Indicates the manufacturer's batch code or lot can be identified
	5.4.2 Do Not Re-use	Indicates a medical device that is intended for one single use only
	5.1.1 Manufacturer	Indicates the medical device manufacturer
	5.2.8 Do Not Use If Package is Damaged	Indicates a medical device that should not be used if the package has been damaged or opened
	5.1.4 Use-by-date	Indicates the date after which the medical device is not to be used
	5.7.10 Unique Device Identifier	Indicates a carrier that contains unique device identifier information
	5.7.7 Medical device	Indicated the item is a medical device
	5.1.3 Date of Manufacture	Indicates the date when the medical device was manufactured
